

### **About Gobin Global**

Gobin Global is a social enterprise, dedicated to providing economic research, evaluation, and capacity building services to our clients in the development and humanitarian fields. We help our clients improve their impact and increase the well-being of the people and communities they serve. We work across thematic areas, taking a whole-of-systems approach with experience in economics & financing, systems strengthening, strategic information, private sector engagement, and governance. We encourage evidenced-based decision making through sustainable systems change, thoughtful research, and strategic support services. We work across sectors in fragile contexts to answer your most sensitive questions and examine the social, health, political, and economic factors driving conflict, displacement, and vulnerability.

### **Health Financing and Economics Consultant**

Gobin Global works with its clients, including government Ministries, to reach Universal Health Care (UHC) goals by addressing policy and institutional bottlenecks within the health financing system. COVID-19 has exacerbated the situation in all countries around the world and created a tremendous burden on the health systems. As such, we are looking for a consultant to assist these efforts, with a specific focus on the private sector. The consultant is a mid-to-senior level role, which will assist other team members in planning, managing, and monitoring services provided in pursuit of health financing and economics goals. We strongly encourage those based in East Africa and with experience working with Ministries of Health and Planning in East Africa. This is a part-time consultancy with a flexible LOE depending on the skills and availability of the selected candidate.

#### **Illustrative Tasks:**

- Ensures the technical excellence of all aspects of health finance, economics, econometrics and modeling across all technical domains of projects
- Provides remote, and possibly on-the-ground, technical support and oversight to health financing and economics activities (depending on COVID-related restrictions)
- Provides analytical and evaluative techniques to identify, consider, and resolve issues or problems related to health financing, costing, and economic evaluation of health policies
- Prepares technical and program-related reports, including presentations, peer-reviewed publications presenting innovation on health policy and financing
- Conduct analytic work, including costing, budget review, and fiscal space analysis
- Regularly update the project lead on progress towards implementation of technical assistance

#### **Requirements:**

- Advanced University degree in health economics, public finance, public policy, public health, business administration strategic management consulting, or a related field
- At least six years of relevant experience in health financing, health economics, health systems strengthening, health policy, or local governance for health
- Strong track record of the provision of high-quality technical support to key stakeholders, preferably within the development finance or global health sector
- In-depth technical expertise and significant experience in health financing, health policy, costing, and econometrics

- Deep professional experience, including a record working in strategy and public policy analysis, program planning and management, and/or equivalent experience
- Experience in global development and working experience in international organizations
- Strong quantitative analytical capabilities with a proven ability to communicate complex results
- Strategic thinking, results-driven and excellent problem-solving skills
- Demonstrated ability to produce high quality reports and deliverables in a timely manner

Application Process:
